Research Interests

Developing **deep learning** methods to address challenges in visual ambiguity and occlusion from a single vantage point source using a continuous image streams. More generally, I am interested in **deep learning**, **computer vision**, **reinforcement learning**, **artificial intelligence**, **remote sensing**, and **robotics**.

Education

University of Kentucky

Master of Science in Computer Science, GPA – 4.0

2018-Present

Advised by Associate Professor Nathan Jacobs

University of Kentucky

Bachelor of Science in Computer Engineering, GPA – 3.8

2016

Graduated Magna Cum Laude

University of Kentucky

Bachelor of Science in Electrical Engineering, GPA – 3.8

2009-2013

Graduated Magna Cum Laude, Minor in Computer Science

Dean's List Fall 2010 to Spring 2013.

Publication

- [1] Weilian Song, Scott Workman, Armin Hadzic, Xu Zhang, Eric Green, Mei Chen, Reginald Souleyrette, and Nathan Jacobs. "FARSA: Fully Automated Roadway Safety Assessment". In: *2018 IEEE Winter Conference on Applications of Computer Vision (WACV)* (March 2018).

Professional Experience

Research.....

Research Assistant

2018-Present

UK COMPUTER VISION LAB

Lexington, KY

- Advised by Associate Professor Nathan Jacobs.
- Designing convolutional neural networks to leverage pointclouds and satellite imagery to regress car freeflow speeds in Kentucky.
- Developed Natural Language Processing (NLP) temporal convolutional and attention-based neural network models to estimate firm economic performance using public SEC text reports.

Machine Perception Intern

2019

JOHNS HOPKINS UNIVERSITY APPLIED PHYSICS LABORTORY

Laurel, MD

- Advised by Ryan Mukherjee and Dr. Gordon Christie.
- Regressed population of displaced communities for disaster relief efforts, utilizing overhead imagery and deep neural networks.

Volunteer Machine Learning Research Assistant

2017-2018

UK COMPUTER VISION LAB

Lexington, KY

- Automated the US Road Assessment Program (usRAP) road safety assessment using a deep convolutional neural network to directly estimate roadway safety based on street-level panorama images, reducing evaluation time to milliseconds per image.
- Integrated the roadway safety estimator into a GPS vehicle routing system to enhance navigation with the capability to identify a balanced, safe and fast, driving route.

Industry.....

Software Development Engineer

2017-2018

BELCAN ENGINEERING GROUP INC.

Lexington, KY

- Developed, maintained, and tested a jet engine diagnostic and fault resolution system, saving over \$100,000 by automating engine maintenance diagnostics.
- Integrated and streamlined a legacy cross-platform build system with modern development tools, mitigating build errors and reducing development time.

Embedded Software Engineer**2016-2017**

BELCAN ENGINEERING GROUP INC.

Lexington, KY

- Streamlined the user interface and reduced diagnostic time of jet engines by identifying, isolating, and purging Onboard Maintenance System inefficiencies and defects.

Software Test Engineer**2015-2016**

BELCAN ENGINEERING GROUP INC.

Lexington, KY

- Designed and implemented Control and Diagnostic System Verification and Validation Tests for 4 P&W Turbofan Jet Engines.
- Discovered mission critical control logic, software, and documentation defects through root-cause analysis, informal testing, regression testing and system testing; leading to best in class, safe, and high performance jet engines.

Founder and Software Developer**2015**

CHANGING TABLE APP

Lexington, KY

- Developed an Android application to aid users in locating men's washrooms containing changing tables in order to alleviate the stress of searching for baby friendly environments.

Software Engineering Co-op**2013-2014**

TEMPUR SEALY INTERNATIONAL INC

Lexington, KY

- Pioneered and developed a GUI and 3D topography mapping application to visually analyze large datapoint datasets, generating streamlined product testing, seamless user experience, and refined product quality.

Software Engineering Intern**2012**

JOHNSON CONTROLS INC

Florence, KY

- Designed and implemented a software algorithm for streamlined Automated Guided Vehicle (AGV) routing, saving \$57,000 per year in scrap reduction and transportation costs.

Technical skills

| | |
|--------------------------|--|
| Programming Languages | C/C++, Python, Verilog, Java, MIPS/IA32 Assembly, Make, \LaTeX |
| APIs/Libraries | PyTorch, Scikit-Learn, Numpy, Pandas, Keras, Tensorflow, OSMNX |
| Operating Systems | Unix/Linux, Windows, OSX, Android |
| Development Environments | Linux Toolchain, Jupyter, PyCharm, Visual Studio, Android Studio, Xilinx |
