# Armin Hadzic

 (859) 396-8870 •  armin.hadzic@uky.edu •  www.arminhadzic.com • **in** armin-hadzic

## Research Interests

Developing Deep Learning methods for simultaneous mapping and localization with integrated semantics. Addressing challenges in visual ambiguity and occlusion from a single vantage point source for Computer Vision systems using a continuous image stream. More generally, I am interested in deep learning, machine learning, artificial intelligence, and robotics.

## Education

**University of Kentucky**
*Bachelor of Science in Electrical Engineering, GPA – 3.75*                                    *2009–2013*
Graduated Magna Cum Laude, Minor in Computer Science

**University of Kentucky**
*Bachelor of Science in Computer Engineering, GPA – 3.8*                                    *2016*
Graduated Magna Cum Laude

Dean's List Fall 2010 to Spring 2013.

## Publication

[1]  Weilian Song, Scott Workman, Armin Hadzic, Xu Zhang, Eric Green, Mei Chen, Reginald Souleyrette, and Nathan Jacobs. "FARSA: Fully Automated Roadway Safety Assessment". In: *2018 IEEE Winter Conference on Applications of Computer Vision (WACV)* (March 2018).

## Professional Experience

### Academia

**Volunteer Machine Learning Research Assistant**                                    **2017-present**
UK Computer Vision Lab                                    *Lexington, KY*
- Summary: Automating the US Road Assessment Program (usRAP) road safety assessment using a deep convolutional neural network to directly estimate roadway safety based on street-level panorama images, reducing evaluation time to miliseconds per image.
- Integrated the roadway safety estimator into a GPS vehicle routing system to enhance navigation with the capability to identify a balanced, safe and fast, driving route.

### Industry

**Software Development Engineer**                                    **2017–Present**
Belcan Engineering Group Inc.                                    *Lexington, KY*
- Developed, maintained, and tested a jet engine diagnostic and fault resolution system, saving over $100,000 by automating engine maintenance diagnostics.
- Integrated and streamlined a legacy cross-platform build system with modern development tools, mitigating build errors and reducing development time.

**Embedded Software Engineer**                                    **2016-2017**
Belcan Engineering Group Inc.                                    *Lexington, KY*
- Streamlined the user interface and reduced diagnostic time of jet engines by identifying, isolating, and purging Onboard Maintenance System inefficiencies and defects.

**Software Test Engineer**                                    **2015-2016**
Belcan Engineering Group Inc.                                    *Lexington, KY*
- Designed and implemented Control and Diagnostic System Verification and Validation Tests for 4 P&W Turbofan Jet Engines.
- Discovered mission critical control logic, software, and documentation defects through root-cause analysis, informal testing, regression testing and system testing; leading to best in class, safe, and high performance jet engines.

**Founder and Software Developer**                                    **2015**
Changing Table App                                    *Lexington, KY*
- Developed an Android application to aid users in locating men's washrooms containing changing tables in order to alleviate the stress of searching for baby friendly environments.

**Software Engineering Co-op**                                           **2013-2014**

TEMPUR SEALY INTERNATIONAL INC                        *Lexington, KY*

- Pioneered and developed a GUI and 3D topography mapping application to visually analyze 5,000 datapoint datasets, generating streamlined product testing, seamless user experience, and refined product quality.

**Software Engineering Intern**                                                **2012**

JOHNSON CONTROLS INC                                    *Florence, KY*

- Designed and implemented a software algorithm for streamlined Automated Guided Vehicle (AGV) routing, saving $57,000 per year in scrap reduction and transportation costs.

## Technical skills

| | |
|---|---|
| Programming Languages | C/C++, Python, Verilog, Java, MIPS/IA32 Assembly, Make, LaTeX |
| APIs/Libraries | Keras, Tensorflow, Scikit-Learn, Numpy |
| Operating Systems | Unix/Linux, Windows, Android |
| Development Environments | Linux Toolchain, Visual Studio, Jupyter, Android Studio, Xilinx |
